

## PUMP MAINTENANCE AND CHECKS

# Making life easier

Greenday offer a comprehensive range of drainage services for both domestic & commercial sectors

### HOW GREENDAY CAN HELP YOU?

Greenday not only installs, maintains and repairs your pumps, we can also include your pumps as part of our regular Planned Preventative Maintenance (PPM) service. This maximizes your uptime and reduces disruptions.

### PUMP INSTALLATION

Greenday Environmental can provide full installation of pump systems for sewage and wastewater including sump chamber, (if required) submersible vortex or macerator pumps single phase 220volt or 3 phase pump or suction pumps depending on application.

We can provide level controls (float switches, probes) high level alarm (sounder, flashing beacon) control panel and all plumbing and electrical requirements carried out to specification.

### PUMP REPAIR

Fault finding can be carried out on site in most applications and repairs carried out where required.

### PUMP MAINTENANCE

Full maintenance programme including cleaning out sump chamber (vacuum tanker) cleaning of pumps and float switches, electrical test of pumps and all floats also check all cables for damage and wear.

### PROBLEM IF YOUR DON'T CLEAN

Poor maintenance can reduce the life expectancy of the motor in the pump and also the switch gear. Grease or sanitary waste (wipes, sanitary towels etc.) can clog and block pump impellers and can sometimes cause pumps to burn out and need to be replaced.
